KING GONG Predator® Add-On 10:15 – Partial Exposure Target ELITE600

Product codes:

Reference: KG-PET
EAN13: -
UPC: -

Product features:

Material: Hardox 600
Thickness: 12mm
Surface Treatment: Rustproof Primer

Product short description:

KING GONG Predator® Add-On 10:15 – Partial Exposure Target ELITE600 represents one quarter of a full-size Predator® silhouette, made from **12 mm Hardox® 600 steel**.

For use with the complete Predator® 10:15 target set. This add-on target replaces the original silhouette and reuses the dedicated stand supplied with that set. It is not a standalone target-and-stand set.

Product description:

Compatibility and required equipment

This add-on is for use with the complete Predator® 10:15 target set. It replaces the original silhouette on the dedicated stand supplied with that set, which you retain. The add-on is not a standalone target-and-stand set.

In the product name, “10:15” identifies the compatible set; the target represents one quarter of a full-size (1:1) Predator® silhouette.

The **KING GONG Predator® Add-On 10:15 – Partial Exposure Target ELITE600** has been developed to expand the **Predator®** training system by accurately reproducing realistic scenarios in which only a limited portion of a threat is visible.

Representing **one quarter of a full-size Predator® silhouette**, this target enables sho train for challenging engagements where only a small exposed area is available. It realistically simulates a hostile subject partially concealed behind a window, vehicle, doorway, wall, barricade, or any other obstacle restricting a full sight picture.

This type of training improves threat identification, sight alignment, trigger control, and shot placement under realistic operational conditions.

Laser-cut from **12 mm Hardox® 600 steel**, the target incorporates **ELITE600** technology, providing exceptional resistance against repeated impacts, including high-velocity cartridges such as **5.56×45mm NATO / .223 Remington**. It is compatible with all calibers up to **12.7×99mm NATO (.50 BMG)** when used in accordance with the recommended minimum safety distances.

Its geometry helps deflect fragments when the target is suspended with a slight forward angle.

Features

- **Predator® Add-On 10:15** module
- **Partial Exposure Target**
- One-quarter of a full-size Predator® silhouette
- Designed to simulate partially exposed threats
- Ideal for tactical, precision, and judgment shooting
- **12 mm Hardox® 600 steel**
- **ELITE600** technology
- Compatible with all calibers up to **12.7×99mm NATO (.50 BMG)**
- Outstanding resistance to high-velocity rifle cartridges, including **5.56 NATO / .223 Remington**
- Anti-corrosion primer coating
- Designed and manufactured in **France** by **QUARTZ PRECISION**
