Product features:

Product short description:

Discover the StormLine Predator® 1:1 hostage-scenario head target, based on the registered Predator® design and developed for all-season use. Attach to the shoulder of a standard Predator® 1:1 target to simulate a hostage-taking scenario. Dimensions (H × W × T): 800 × 430 × 3 mm. Pack of 50. Made in France.

Product description:

Discover the StormLine Head "Hostage-Taker" Targets StormLine Predator® 1:1, the new generation of full-size silhouette targets, inspired by the registered Predator® design and developed in an all-season version engineered to withstand the most extreme conditions.

? **Main Features**

- Pack of 50 Head "Hostage-Taker" Targets StormLine Predator® 1:1 proportions: real human size, ideal for operational training
- StormLine Version:
  - Rot-proof material, unaffected by humidity, rain, frost, and UV

    - Non-deformable, even in extreme conditions (storms, high heat, intense cold)
    - Superior mechanical strength
- Compatible with all types of ranges and outdoor environments
- Clean perforation, no tearing, perfect impact visibility

? Designed for intensive use

The StormLine technology is an advantageous replacement for honeycomb cardboard:

- No water-related degradation
- No swelling
- Extended lifespan
- Retains rigidity even under heavy rain or during long shooting sessions

???? For whom?

- Law enforcement
- Operational training
- Simulation and rapid-response drills
- Shooters seeking a high-end, durable 1:1 silhouette head

?? StormLine Eco-Responsible Commitment

Built to last, designed for the planet. The StormLine target uses 100% recyclable polypropylene (recycling code 5), ensuring clean recovery with no polluting components.

Thanks to its rot-proof and weather-resistant structure, StormLine offers a long service life, reducing the consumption of disposable targets and significantly decreasing waste generated by shooting training.

At the end of its use, StormLine targets can be fully recycled through standard polypropylene processing channels: sorting ? washing ? grinding ? remelting ? new material.

Less waste, more impact.

StormLine follows an environmentally respectful approach, reducing both carbon footprint and equipment renewal frequency.
