

KING GONG StormLine Shooting Target Scale 1:1 Shahed 136

Product codes:

Reference: KG-SHAHED136SL

EAN13: -

UPC: -

Product features:

Product short description:

Discover the **StormLine Shahed 136 1:1 Scale Drone Target**, a full-size reproduction of the well-known loitering munition, developed in an all-season design and engineered to withstand the most extreme weather conditions.

Faithfully replicating the **exact dimensions of the real Shahed 136**, this target provides exceptionally realistic firearms training for the **interception and neutralization of slow-moving aerial threats**.

It allows shooters and specialized units to quickly familiarize themselves with the drone's **visual signature, impact surface, and probable lethal zones**.

Sold individually.

Made in France.

Product description:

Discover the **StormLine Shahed 136 Drone Target – Full 1:1 Scale**, the new generation of full-

size silhouette targets, inspired by real operational models and developed in an all-season version designed to withstand the most extreme conditions.

Using a full-scale target greatly enhances ammunition effectiveness evaluation, shot placement accuracy, and understanding of critical engagement points, making training directly applicable to real operational conditions.

? Key Features

- **True 1:1 Scale Silhouette:** full-size reproduction of the Shahed 136 drone, ideal for training in the neutralization of slow-moving aerial threats.
- **StormLine Version:**
 - Rot-proof material, unaffected by humidity, rain, frost, or UV
 - Maintains its shape even in extreme conditions (storms, high heat, intense cold)
 - Superior mechanical strength
 - Compatible with all types of ranges and outdoor environments
 - Clean perforation with no tearing, ensuring perfect impact visibility

? Designed for Intensive Use

StormLine technology is a superior alternative to corrugated cardboard:

- No water damage
- No swelling
- Greatly increased service life
- Maintains rigidity even under heavy rain or during long training sessions

???? Who Is It For?

- Operational training
- Simulation exercises

?? StormLine Eco-Responsible Commitment

Built to last, designed for the planet.

StormLine targets use a **100% recyclable monomaterial** (polypropylene – code 5), allowing clean recovery without polluting components.

Thanks to their rot-proof, weather-resistant structure, StormLine targets offer a **long lifespan**, reducing the consumption of disposable targets and significantly limiting waste from firearms training.

At the end of their service life, StormLine targets can be **fully recycled** through standard polypropylene recycling channels:
sorting ? washing ? grinding ? remelting ? new material.

Less waste, more impact.

StormLine is part of an environmentally conscious approach, reducing both carbon footprint and the frequency of equipment renewal.
