

KG-HHDM – KING GONG Direct-Mount Target Bracket for Hornady HIT

Product codes:

Reference: HN-HHDM

EAN13: -

UPC: -

Product features:

Product short description:

Add a clear and reliable visual impact signal instantly to your steel gong targets for long-range shooting.

This mount has been specifically designed to house the **Hornady HIT impact detector**, positioning it behind the KING GONG steel target, safely protected from direct impacts. The detector is **securely integrated into the mount** and fastened using **high-strength double-sided Velcro**.

A **45-degree angled reflective indicator**, offset to the side of the target, provides **immediate visibility of the detector's LEDs**, even at long distances.

A simple, rugged, and highly effective solution.

Advantages:

- Compatible with **all steel targets KING GONG and rigid panels**
 - **Optimal protection** for the impact detector
 - **Solid one-piece construction** in full nylon
 - **Quick and easy installation**
-

Product description:
