

KING GONG EDI – Oscillating Target Stand for Predator® Cardboard and StormLine Targets

Product codes:

Reference: KG-EDI

EAN13: -

UPC: -

Product features:

Product short description:

The KING GONG EDI is a galvanized dynamic target stand designed for outdoor use.

Its pendulum system creates a side-to-side oscillating movement for more challenging exercises focused on target acquisition, tracking and engagement of a moving target.

Compatible with Predator® cardboard and StormLine silhouette targets, it is suitable for shooting clubs, training centres and professional users.

The stand is supplied with a 5 kg counterweight, release block and pull cord.

Product description:

A swinging target stand for dynamic training

The KING GONG EDI is a dynamic target stand designed to create a side-to-side pendulum movement. It transforms a stationary Predator® silhouette into an oscillating target, adding movement and variety to shooting exercises.

The system can be used to develop exercises focused on visual acquisition, tracking and engagement of a moving target. It can form a standalone training station or be incorporated into a course containing several different stations.

Designed for outdoor use

The galvanized structure provides long-lasting protection against corrosion and is suitable for outdoor installation. The KING GONG EDI is designed for shooting clubs, training centres and professional organizations requiring reliable equipment for regular training sessions.

Compatible with Predator® cardboard and StormLine targets

The stand is compatible with both Predator® cardboard silhouettes and weather-resistant StormLine targets. This dual compatibility allows the equipment to be adapted to different environments, weather conditions and training objectives.

Operating principle

The release block initially holds the target in its starting position. The pull cord allows the mechanism to be released remotely, triggering the side-to-side oscillating movement. The supplied 5 kg counterweight supports the pendulum action of the system.

KEY FEATURES

- Side-to-side oscillating movement
- Remote activation using a pull cord
- Galvanized structure designed for outdoor use
- Compatible with Predator® cardboard targets
- Compatible with Predator® StormLine targets
- Standalone configuration suitable for training courses
- Designed for dynamic shooting exercises
- Supplied with its release system

PACKAGE CONTENTS

- 1 galvanized KING GONG EDI dynamic target stand
- 1 × 5 kg counterweight
- 1 release block
- 1 pull cord
