

KING GONG Half Predator® II Silhouette ELITE600

Product codes:

Reference: KG-HCMHII

EAN13: -

UPC: -

Product features:

Material: Hardox 600

Thickness: 12mm

Surface Treatment: Rustproof Primer

Product short description:

KING GONG Predator® II Half Silhouette ELITE600 is a reactive steel target representing a realistic human upper torso, based on the registered Predator® design. Manufactured from **12 mm Hardox® 600 steel**, it delivers outstanding resistance to repeated impacts, including the fastest rifle calibers. Its half-silhouette format is ideal for tactical training, precision shooting, and scenarios requiring a reduced engagement area. Compatible with all calibers **up to 12.7×99mm NATO (.50 BMG)**, it is protected with an anti-corrosion primer and features **two Ø12 mm mounting holes** for quick and secure hanging.

Product description:

The **KING GONG Predator® II Half Silhouette ELITE600** is a next-generation reactive steel target designed for sport shooters, instructors, military, and law enforcement professionals seeking maximum realism in a compact format.

Based on the **registered Predator® design**, it accurately reproduces the proportions of a human upper torso, providing a highly realistic target for tactical shooting, precision rifle training, and operational shooting scenarios.

Laser-cut from **12 mm Hardox® 600 steel**, this target incorporates the **ELITE600** technology developed by QUARTZ PRECISION to withstand repeated impacts from the most demanding calibers, including high-velocity rounds such as **5.56×45mm NATO / .223 Remington**, while remaining compatible with all calibers up to **12.7×99mm NATO (.50 BMG)** when used in accordance with the recommended minimum shooting distances.

Its optimized geometry promotes safe fragmentation by directing bullet splatter toward the ground when the target is correctly suspended with a slight forward angle.

Features

- Registered **Predator®** design
- Realistic **half silhouette (upper torso)** profile
- Premium **Hardox® 600** steel
- **12 mm** thickness
- **ELITE600** technology
- Compatible with all calibers up to **12.7×99mm NATO (.50 BMG)**
- Outstanding resistance to high-velocity rifle cartridges, including **5.56 NATO / .223 Remington**
- Anti-corrosion primer coating
- **Two Ø12 mm mounting holes** for easy suspension
- Designed and manufactured in **France** by **QUARTZ PRECISION**
