

KING GONG EDI Dual – Oscillating Target Stand for Two Predator® Cardboard and StormLine Targets

**Product codes:**

Reference: KG-EDI2

EAN13: -

UPC: -

Product features:**Product short description:**

The KING GONG EDI Dual is a galvanized dynamic stand designed to move two Predator® silhouette targets.

Its pendulum system creates a side-to-side oscillating movement for more advanced exercises focused on target acquisition, tracking, transitions and engagement of moving targets.

Compatible with Predator® cardboard and StormLine targets, it is designed for intensive outdoor use by shooting clubs, training centres and professional organizations.

Supplied with counterweight, release prop and pull cord.

Product description:

A dynamic system for two Predator® targets

The KING GONG EDI Dual is a professional target stand designed to hold two Predator® silhouettes and generate a side-to-side oscillating movement.

This dual configuration expands training possibilities by introducing two moving targets into the same exercise. It can be used as a standalone training station or incorporated into a course featuring several dynamic target systems.

Moving-target training

The pendulum movement can be used to develop a range of skills:

- Visual acquisition of moving targets
- Transitions between two targets
- Movement tracking
- Engagement timing and rhythm
- Accuracy on oscillating targets
- Creation of progressive dynamic scenarios

Remote mechanical activation

The targets are initially held in their starting position by the release system. The pull cord allows the mechanism to be activated remotely, triggering the oscillating movement.

The counterweight system then generates the lateral movement of the targets. Its fully mechanical operation makes the equipment easy to install and removes the need for an electrical power supply.

Designed for outdoor use

The galvanized structure provides long-lasting protection against corrosion and is suitable for regular outdoor use.

The KING GONG EDI Dual is intended for shooting clubs, training centres, government organizations and professional users requiring robust, reliable equipment for intensive training.

Compatible with Predator® cardboard and StormLine targets

The stand accepts two types of Predator® silhouette:

- Predator® cardboard targets
- Weather-resistant Predator® StormLine targets

Cardboard targets are suited to conventional training sessions, while StormLine targets are particularly suitable for outdoor installations and challenging weather conditions.

KEY FEATURES

- Dynamic stand for two Predator® targets
- Side-to-side oscillating movement
- Remote mechanical activation
- No electrical power supply required
- Galvanized structure for outdoor use
- Compatible with Predator® cardboard targets
- Compatible with Predator® StormLine targets
- Designed for professional training environments
- Made in France

PACKAGE CONTENTS

- 1 galvanized KING GONG EDI Dual dynamic target stand
- 5 kg counterweight
- Release mechanism
- Release prop
- Pull cord

Predator® targets sold separately.

SPECIFICATIONS

Brand: KING GONG

Range: EDI

Version: Dual

Capacity: 2 targets

Movement: Side-to-side oscillation

Operation: Mechanical counterweight system

Activation: Remote pull cord

Finish: Galvanized

Application: Outdoor use

Compatibility: Predator® cardboard and StormLine targets

Users: Shooting clubs, training centres and professionals

Electrical power required: No

Country of manufacture: France
