Product description:

Predator® Thermal 3Z ELITE600 — 3 Heating Zones

The **QS-PT3Z** target from QUARTZ SYSTEMES is based on the **Predator® II ELITE600**. This anatomically proportioned standing shooter silhouette is designed for shooting training with thermal imaging sights. This revised, simplified version has been available since 2025 and uses the proprietary registered Predator® design.

Thermal signature: head, chest and pelvic area

The **3Z** version features **3 heating zones: head, chest and pelvic area**, creating a representative thermal signature on the target.

Setup and operation

Complete target supplied with a ground base and armoured support stand.

The THERM2026-3 system automatically starts a warm-up phase followed by a repeating maintenance phase. The zones heat successively. A light and sound sequence signals startup, and a green indicator shows operation. The red battery alarm with repeated beeps stops heating; restart is required after checking and recharging or replacing the batteries.

Power supply

This version uses **2 removable batteries** and is supplied with 2 **BOSCH Professional 18V 5.0 Ah batteries**. Runtime depends on battery capacity and operating conditions.

The system accepts BOSCH Professional 18V or compatible batteries in different Ah capacities.

ELITE600 range

The ELITE600 range combines steel grade and thickness for high abrasion resistance. It is optimised for high-velocity projectiles, including 5.56 mm NATO / .223 Remington.
