Product short description:

POSCA PC-8K blue paint marker with a 8 mm broad chisel tip. Use it to outline target areas, add clear numbers and prepare stencil markings. Opaque water-based paint. Sold individually.

Product description:

A marker for preparing shooting targets

Use the blue POSCA PC-8K to outline target areas, add clear numbers and prepare stencil markings. Its 8 mm broad chisel tip suits this type of marking. Choose a colour that contrasts with the target background.

Features

8 mm broad chisel tip. Water-based pigmented paint. Colour: blue. Sold individually.

Directions

Shake with the cap on, then prime the tip on a test surface. Apply to a clean, dry surface without excessive pressure and allow to dry before handling. Replace the cap after use. Durability and removability depend on the surface: test first.

Choose your tip

PC-7M: impact identification and annotations. PC-8K: outlines, numbers and broad lines. PC-17K: large blocks of colour and stencilled areas.
